Need Sustainable Packaging?

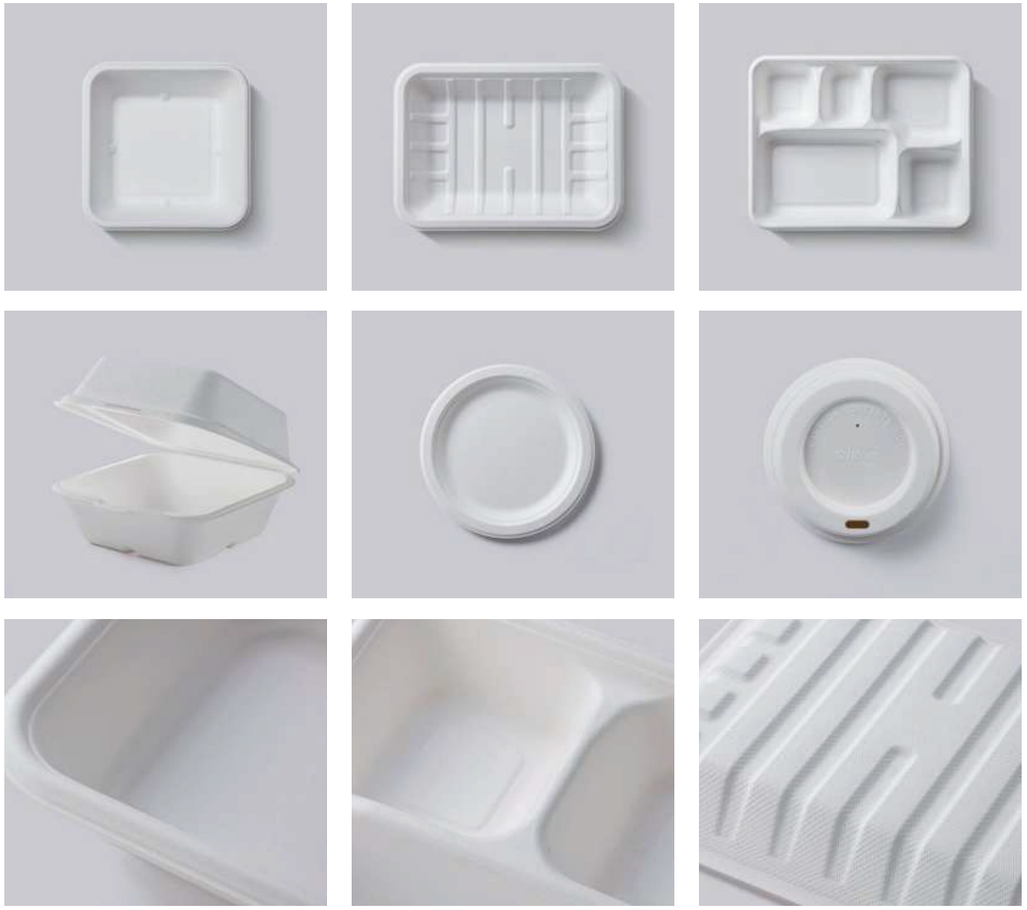

For a Healthier Lifestyle, it is about time for Sustainable Packaging Solution

Begin your green life with moohae,
the safe and sustainable molded pulp

Here is the solution - moohae !

Begin your green life
with moorim

Sustainable and Responsible

It is produced from FSC®-certified pulp, and is also certified as biodegradable by a European certification body. We will continue to strive to minimize our impact on the environment from the creation of our products to their disposal after use.

Safe and Certified

It is designed to be safe, having passed a microplastic test with undetected results. Additionally, it has been certified for food contact safety, having passed tests by The United States Food and Drug Administration(FDA) and The European Food Safety Authority(EFSA).

Sturdy and Hygienic

It is made from natural raw pulp, which is delivered directly via a transfer pipe to the molding facility to produce a top-quality product with defined fibers.
It is also compressed under high pressure, making it sturdier compared to other products.

moohae

Moorim's solution for a better everyday life

The only molded pulp product in Korea made from natural raw pulp, attracting attention as an alternative to plastic.
