<sup>1</sup> Recyclable percentage (Fibre yield) means the percentage suitable for recycling or usable in papermaking. It corresponds to total mass of the sample (50g oven-dry  $\pm$  100%) minus total reject. Water-soluble, colloiddally dissolved or finely dispersed colloiddally dissolved substances which pass into the water phase are not considered. These substances can be determined using the PTS-RH 025:2022 method.
